

MANAGE AUTOMATE ORCHESTRATE

Who We Are

AppViewX is a global leader in the management, automation and orchestration of network services in brownfield and greenfield data centers. The AppViewX Platform helps network operations (NetOps) adapt to technology and process demands, such as agile, DevOps, IoT, cloud, and software-defined infrastructure. AppViewX delivers greater business agility and efficiency at a lower cost.

Platform

 **DISCOVER** network components and configurations in existing data centers

 **MANAGE** multi-vendor and hybrid infrastructure from a visual view

 **DESIGN** the automation and workflow for each network component

 **AUTOMATE** network service requests from a catalog or visual view
